

# Clean air in cities:

## Video reflection

Notes on the video:

These English words are new to me:

English	German

### Task: True or False?

Please answer the following statements and questions in small groups:

**1** *"In the period from 2000–2014, particulate matter and nitrogen oxide levels decreased."*

true                      false

**2** *"The biggest contributor of air pollution in urban areas is domestic heating."*

true                      false

**3** What percentage of nitrogen oxides is caused by traffic?

**4** Name three solutions for good air quality in cities mentioned in the video.

**5** *"London, Berlin, Rome and Stockholm are setting up low emission zones and introducing congestion charges as a solution against air pollution."*

true                      false

**6** What can you do yourself against air pollution in the city?

**7** What other ideas do you have for keeping our air clean? Your answers don't just have to be about traffic.
